

RUST INHIBITOR

What is Rust Inhibitor?

Milligan's Rust Inhibitor is a unique refined product made from high quality canola derivatives. Acting as a heavy-duty liquid for removing rust and keeping it off. Our product is easy to use, non-toxic and biodegradable so it is gentle on the environment.

When should I use Rust Inhibitor?

Use it anywhere that corrosion is a problem:

- On lawn care equipment (try it on the underside of your lawn mower to keep grass from sticking)
- On vehicles, agricultural and road maintenance equipment.
- On tools and yard machinery
- Industrial, agricultural, and consumer applications

How is it used?

Quick and easy to use, just apply Milligan's Rust Inhibitor and wipe off dirt, grease, grime and rust. Then apply a generous coating to keep them from coming back. Safe for use on all metal surfaces and environmentally responsible!

Please avoid long term contact with rubber and painted surfaces

Milligan's Rust Inhibitor after 36 hours of intense moisture.	Without Milligan's Rust Inhibitor after 36 hours of intense moisture.
	

Protect your equipment now before it's permanently damaged!
